

Display Sample Validation Record

Record observed evidence against an agreed plan. All results start blank.

01 / Freeze the configuration and test plan

Project / record ID

Date / test owner

Exact model / suffix / sample IDs

Datasheet / drawing revision

Host board / software / interface / harness

Touch / bonding / cover glass / FPC / backlight configuration

Bench or in-product setup / fixtures / measurement equipment

Agreed test-plan ID / conditions / acceptance criteria

Use agreed conditions and current controlled documents; do not infer panel ratings.

If the configuration changes, identify which checks need to be repeated.

Display Sample Validation Record

Record observed evidence against an agreed plan. All results start blank.

02 / Repeatable observations (copy this page for additional checks)

Record ID / sample ID

Date / operator

Check 01

Check / agreed criterion / setup and applied conditions

Observation / measured value and units / evidence file

Status / deviation / action / owner

Check 02

Check / agreed criterion / setup and applied conditions

Observation / measured value and units / evidence file

Status / deviation / action / owner

Write the actual outcome; leave unperformed checks blank or mark them not tested.

A displayed test pattern is not evidence of full product qualification.

Display Sample Validation Record

Record observed evidence against an agreed plan. All results start blank.

03 / Disposition and responsibility

Record ID / configuration revision

Review date / responsible reviewer

Coverage summary / missing evidence / outstanding checks

Deviations / corrective action / responsible owner and target date

Retest evidence / changed configuration / affected results

Recorded disposition and its scope / approving person / document reference

Approval requires an authorized person and a controlled release decision.

This blank working record is not a test standard, certificate or factory pass report.

Keep confidential project data within your approved document-handling process.
